

## Activated Zinc pyrithione:

Specific products  
for the dermatological practice

## BLUE CAP®

### What is it? (PRODUCT INFORMATION)

Blue Cap® topical preparations are indicated for the daily hygiene of skin which has a tendency to the different types of psoriasis, eczema, and seborrheic dermatitis. Blue Cap® contains activated Zinc Pyrithione, which exerts a high antibacterial and antifungal action against a series of pathogenic microorganisms (streptococcus, staphylococcus); Blue Cap® products have a wide range of positive effects, due to the inhibition of the cytostatic action. Blue Cap® is specifically effective against Pityrosporum ovale and Pityrosporum orbiculare, acting both on the surface and inside the corneal layer. The products relieve itching, eliminate scaly skin which may be present on the body or scalp and improve the general appearance of the skin. Blue Cap® preparations do not contain either corticosteroid or cytostatic. The products have rapid onset of action, penetrate the deepest layer of the skin in very short time. The products do not cause any side effects even when used for an extended period of time.

### Where to Use? (INDICATIONS)

- Psoriasis / Scalp Psoriasis/ Eczema / Dandruff / Seborrhea / Contact dermatitis
- Fungal infections of the skin such as Nail Fungus/Skin Fungus/Ringworm/Athletes Foot/Jock Itch

### How to use? (DOSING GUIDELINE)

- BLUE CAP® Spray relieves itching, eliminates scaly skin on body and scalp and improves the appearance of the skin. It is ideal for the body, absorbs well with good moisturizing properties. It also contains an applicator for easy and direct application to the scalp for effective moisturizing.
- BLUE CAP® Cream is used specially in the cases where the skin is dry and cracked. It is most effective when the lesion is disseminated or patchy. It is a gentle yet effective moisturizer that can be used as an alternative to Spray
- BLUE CAP® Shampoo is suitable for the scalp with dandruff or with dry or greasy seborrhea. In the case of dandruff, it relieves itching and reduces scaling. It naturally moisturizes the skin and eliminates the excess of grease. It helps clean the affected skin completely and eliminate scaling. It normalizes cell activity on the scalp and has a positive effect on hair growth.

It is the perfect complement to BLUE CAP® Spray and BLUE CAP® Cream to improve fat metabolism and support the immune system. It also corrects genetic error in the cell, controlling its division (keratosis control).
